EDUCATION

Samsung Innovation Campus

2023.10 - 2024.12

Big Data

FPT University Hanoi

2022.09 - PRESENT

Software Engineering

HUS High School for Gifted Students

2019.09 - 2022.05

Chemistry

WORK EXPERIENCE

POPositive

2025.04 - PRESENT

Founder & Lead Developer

Founded and led the development of POPositive, a Point of Sale (POS) solution backed by FPT University to empower small and medium-sized enterprises (SMEs) in Vietnam. I architected a comprehensive platform to digitize and streamline business operations, successfully tackling key market challenges including manual inventory management, slow payment processing, and complex e-invoicing compliance: Demo

- Architected a dual-component system with a responsive Vue.js frontend for the sales interface and a robust Laravel backend for the admin portal.
- Engineered a high-speed payment module supporting multiple methods (QR Code, cash) and automated the generation of legally compliant electronic invoices.
- Reduced hardware costs for businesses by implementing a barcode scanning feature that utilizes the device's built-in camera.
- Developed real-time inventory and product management systems to provide owners with instant operational oversight.
- Built an intuitive admin dashboard featuring visual revenue reports, customer relationship management (CRM), and staff access controls.

TDA Global

2025.03 - 2025.09

Junior Fullstack Developer

- Develop business tools for internal company use:
 - End-to-end system for POD product image rendering: Mockup Automation
 - Paypal management tools
 - Internal Workspace for TDA Global: Set up and managed a company-wide workspace on a Network-Attached Storage (NAS) system, handling centralized file storage, internal email, and other services: TDA Cloud
 - Developed and maintained AI systems using Retrieval-Augmented Generation (RAG).
 - Built and updated AI workflows leveraging ComfyUI for model orchestration and experimentation.
- Develop Web and Mobile apps:
 - NFCite: A website that lets businesses create interactive web pages linked to NFC tags and QR codes using a visual drag-and-drop builder.
 - Biểu đồ giá vàng: A mobile app providing real-time gold price data.

MegaAds Software Technology and Online Advertising Joint Stock Company

2024.08 - 2025.01

Fresher Fullstack Developer

- Maintain, update source code of several E-commerce or POD platforms:
 - printerval.com (83.2K visits)
 - chiaki.vn (1.6M visits)
 - nhathuocsuckhoe.com (7.8K visits)
 - vuahanghieu.com (858.5K visits)
 - thegioigiaj.com
 - customyourprint.com
- Develop development tools for internal company use
- Mainly use Laravel, ExpressJS and AngularJS

KIS Vietnam Creative Co., LTD

2024.02 - 2024.08

Collaborator Unity Developer

Develop 2D casual games using Unity engine:

- Seafood Merge (1K downloads)

Chillin' Studio

2023.05 - 2024.01

Unity Developer & Co-founder

Develop 2D casual games using Unity engine:

- Wonder World

Vietnam Robotics Challenge - FPT University

2023.05 - 2023.09

Technical Mentor

- Mentoring high school students in understanding the concept of Arduino-based machines
- Provide technical support in mechanical designing & programming using C++/Tinker Cad

HONORS & AWARDS

Second Runner-up - JS Club Algorithm Arena 6.0

2025

Consolation Prize - FPT Education Research Festival

2024

Consolation Prize - JS Club Coding Inspiration

2023

PROJECTS

ToySharing

2025.11 - 2025.11

Fullstack developer

Project description: A simple toy-sharing system, final project for PRN232 course at FPT University

Technologies: ASP .NET, AngularJS

Responsibilities: System design, full-stack development

Github: makecolour/FinalProject

Clowndinary

2025.08 - 2025.09

System designing, fullstack developer

Project description: A web application to simplify media uploads to the multiple CDN platforms through a clean, user-friendly interface.

Customers: TDA Global

Technologies: ExpressJS

Responsibilities: System design, full-stack development, Cloudinary and Bunny Storage API integration.

Github: makecolour/Clowndinary

QR Generator

2024.11 - 2024.11

System designing, fullstack developer

Project description: Provide APIs and simple UI to generate Vietnam Banking QR based on VietQR documents.

Customers: MegaAds.jsc

Technologies: ExpressJS, AngularJS

Github: makecolour/bank-qrcode-generator

Trust Management System

2024.05 - 2024.08

Researcher, fullstack developer

Project description: Developed based on the research document "A Novel Approach of Reputation Trust Metric Based on Knowledge Graph Combined with Large Language Model for Improving Trust Worthiness Calculation on Social Networks" to visualize and provide results from the research process. Consists of a web application and a Chromium extension for Facebook.

Team size: 3

Technologies: Maven, Java SpringBoot, ChromeAPIs

Github: makecolour/TrustScore - makecolour/TrustScoreExtension

Develop research tools and Trust Management System to bring our research to industry environment

Knowledge Revising System

2024.04 - 2024.07

Leader, fullstack developer

Project description: An MVC web app to manage learning materials and learning activities, help teachers and students can interact in many different ways

Team size: 3

Technologies: Java Springboot, Maven

Github: makecolour/KnowledgeRevisingSystem

Managing the project and members, database & system designing, document writing, fullstack developing

FU-Autokit

2024.01 - 2024.09

System designing, developing

Project description: An extension for FPT University's students to automating user interactions on several websites

Customers: ~50 students from FPTU

Technologies: ChromeAPIs, jQuery, client sided JavaScripts

Github: makecolour/FU-Autokit

SKILLS

Languages English (IELTS 6.5 – CEFR B2)

Japanese (Elementary – JPD113 & JPD123)

Programming languages PHP, JavaScript/TypeScript, Java, C#, HTML/CSS,...

Frameworks Laravel, .NET, SpringBoot, Vue, React, AngularJS, Unity, Cocos,...

Databases MySQL, MongoDB, SQL Server, Redis,...

Others Amazon Web Services, Git, ChromeAPIs,...

CERTIFICATIONS

Project Management Project - University of California, Irvine

2025

Certified Ethical Emerging Technologist - CertNexus

2024

Software Development Lifecycle - University of Minnesota

2024

Web Design for Everybody: Basics of Web Development & Coding - University of Michigan

2023

Computer Communications - University of Colorado System

2023

ACTIVITIES

Volunteer

Responsible for ensuring a smooth and efficient competition flow and maintaining a professional demeanor throughout the event.

Algorithm Arena 4.0

2022.12 - 2023.03

Vice Head Organizer

- o Prestigious event that showcases the skills and talents of programmers.
- o Organizer of the 4th annual competitive programming contest of JS Club .
